

#### Parking Lot Views:

It was too hard to count the spaces from just one satellite view- some views were obscured by buildings and trees. I broke out the view into four sections.

Section A: 5 Parking Spots

Section B: 9 Parking Spots

Section C: 37 Parking Spots \*

Section D: 11 Parking Spots

Total : 62 Parking Spots

Section C shows spaces 17,18,19 - which were approved by planning commission as approved restricted spots. Also, in this section I showed space # 16- cars park here but a yellow line is currently missing along the side the building. # 16 was not counted in my testimony to planning commission in which I stated that we had 58 lined spots. We do not need to include it here.

#### Summary:

Total Parking Spaces: 58: spaces we currently have and reported to planning commissioners

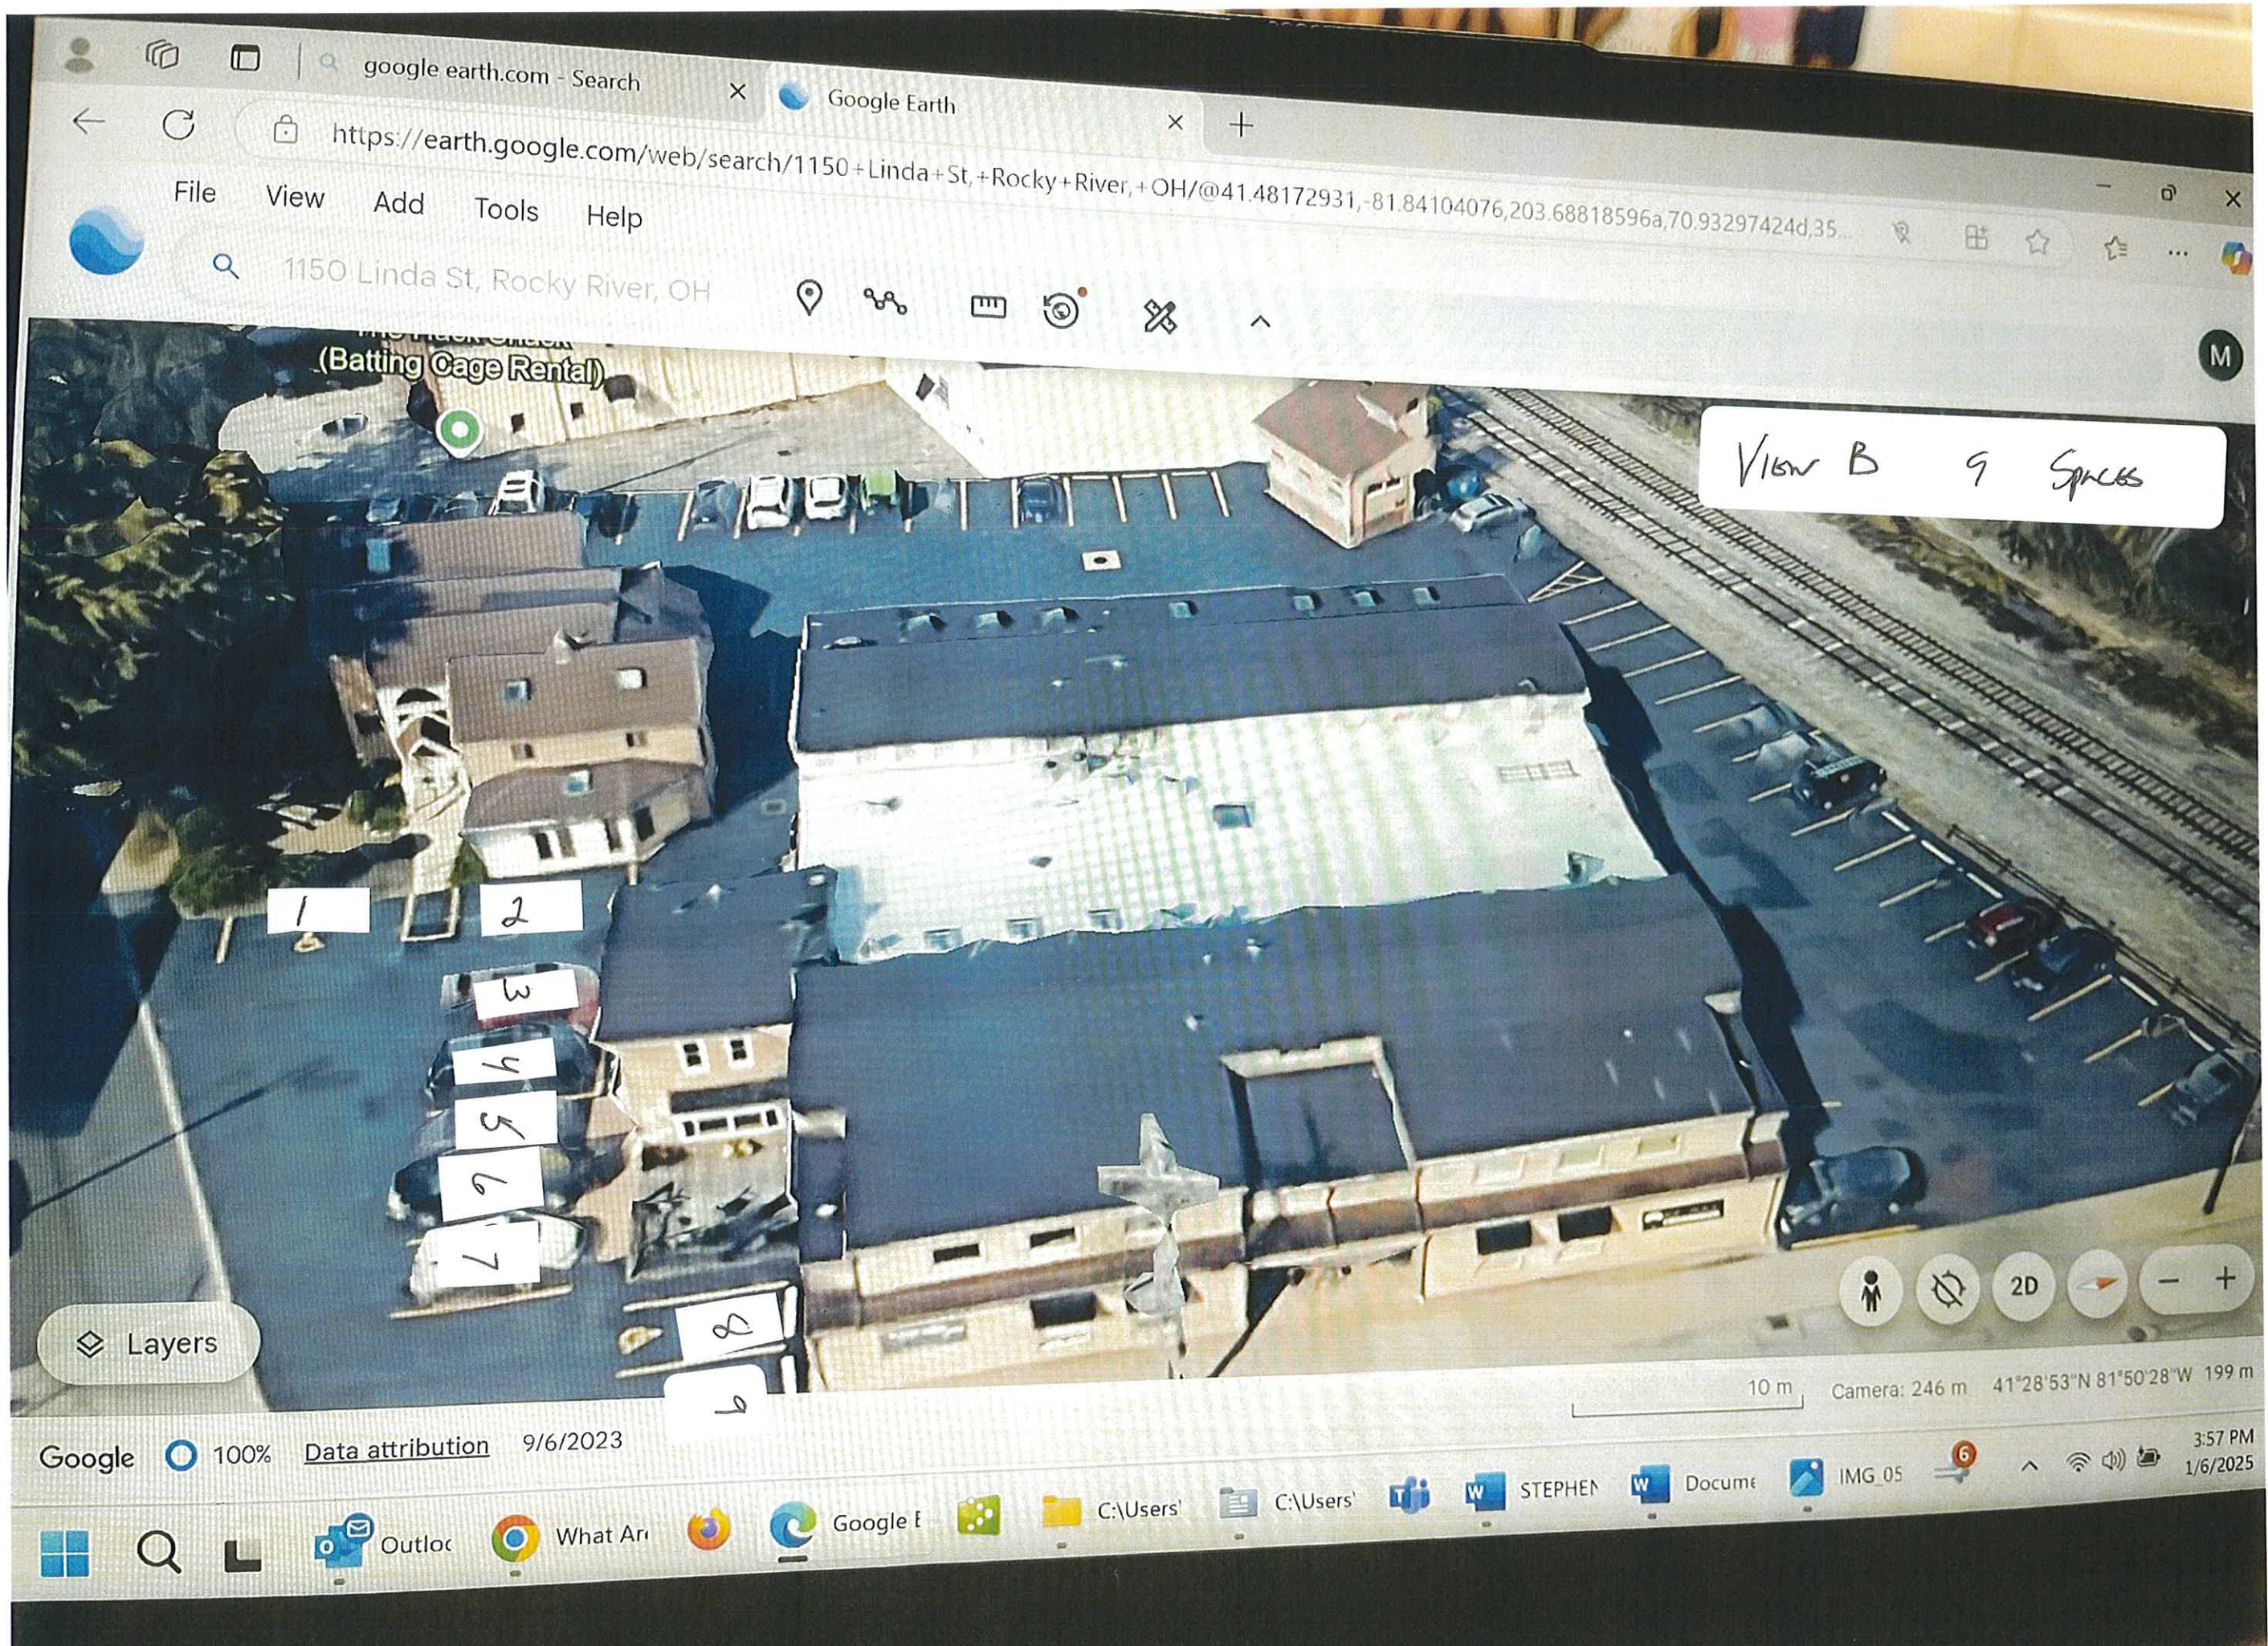

Total approved restricted parking: 3

Total Spaces currently available : 61

Variance needed to meet City calculations of parking requirements: 3
