

Hi Aimee -

I hope you're doing well. I'm planning to install a split-unit air conditioning system at my home and need to request a variance from Rocky River. As part of the process, I'm reaching out to you for your approval.

The unit will be situated on east side of my house and will meet all city installations and decibel requirements. Currently the unit is situated outside of my toddler's bedroom which is creating maintenance issues as well as safety concerns. Placing the unit in this new proposed location will limit said issues and concerns. Please let me know if you're comfortable supporting this request — I'd really appreciate it.

I'm happy to answer any questions or discuss further. Thanks in advance!

Best,

Scott Galanos

Hi Scott,

I don't have any objections, issues, or concerns with your proposal to install a split-unit air conditioning system at your home as described above. Please consider this approved from my end. Thanks!
