

Honeybee Sanctuary

20 Honeybee beehives will be on top of 4 concrete pads located over 80 feet back from the sidewalk.

Each concrete pad will be 20' x 7' and will hold five beehives which are approximately 20" x 6" in size.

The beehives will be professionally maintained by Youth Bee Works which is a non-profit. For more information visit Youthbeeworks.com.

Various types of plants that will provide nectar for the bees will be planted on a plot of land approximately 80' x 80' which will be located between the sidewalk and the beehives.

The drawing for the sanctuary indicates the concrete pads in "red" surrounded by the walking path in "brown". The "blue / green" area between the sidewalk and the beehives will be all the plantings.

I also own the 4 parcels (2 to the North and 2 to the South) of the proposed Honeybee sanctuary.
