

To the Commission Members,

Right now, the existing propane cage has no protective barriers from a vehicle that could drive into it. Adding barriers will substantially encroach on the sidewalk, making passing by difficult, especially when vehicles are parked in front of the cage.

I don't have a problem with the deli selling firewood, but I do have an issue with the propane and ice machine. This may sound shallow, but all those items taking up space on the sidewalk entry are ugly. They make the shop look like a bad gas station convenience store. The building is attractive without all that clutter. One of the nice things about Rocky River is that most of the stores and shops do a very good job on the exteriors of their locations, making the city beautiful, especially in a mostly residential area such as this. Perhaps the owner of the shop can find interior space for the ice machine and firewood. Since there are so many places nearby that sell propane, maybe he can forgo selling it. Thank you!
